

Technip awarded a contract for a chemical plant in China

April 14, 2011

Technip was awarded by Bluestar Adisseo Nanjing Company Limited a detailed engineering, procurement and project management services contract for a methionine* plant in Nanjing, Jiangsu Province, China.

The plant, which will be the first integrated liquid methionine unit in China, will have a production capacity of 140 kilotons per year.

Technip's operating center in Shanghai, China will execute the contract, of which mechanical completion is scheduled to be completed in the 2nd quarter of 2012. This award follows the successful execution by Technip of the basic engineering design and the process design package.

* Methionine: an amino acid containing sulphur found in most proteins and essential for nutrition.

Technip is a world leader in the fields of project management, engineering and construction for the oil & gas industry, offering a comprehensive portfolio of innovative solutions and technologies.

With 23,000 employees around the world, integrated capabilities and proven expertise in underwater infrastructures (Subsea), offshore facilities (Offshore) and large processing units and plants on land (Onshore), Technip is a key contributor to the development of sustainable solutions for the energy challenges of the 21st century.

Present in 48 countries, Technip has operating centers and industrial assets (manufacturing plants, spoolbases, construction yard) on five continents, and operates its own fleet of specialized vessels for pipeline installation and subsea construction.
