

Technip Energies and JGC Corporation awarded FEED contract by ExxonMobil for the Rovuma LNG project in Mozambique

September 25, 2024

Technip Energies (PARIS: TE) and JGC Corporation have been awarded the Front-End Engineering Design (FEED) contract by ExxonMobil – on behalf of Mozambique Rovuma Venture (MRV), a joint venture of ExxonMobil, Eni, and CNPC – for the Rovuma LNG project at Palma in the Afungi peninsula, Northeast of Mozambique.

The Rovuma LNG project will consist of an LNG plant with a total production capacity of 18 Mtpa⁽¹⁾, comprising 12 fully modularized LNG trains of 1.5 Mtpa each.

The plant design will feature electric-driven LNG trains instead of gas turbines, reducing greenhouse gases emissions compared to conventional LNG projects. It will also include prefabricated and standardized modules to be assembled at the project site in Mozambique, offering cost competitiveness and certainty in delivery schedule.

Mario Tommaselli, SVP Gas and Low Carbon Energies of Technip Energies commented: *“We are honored to have been selected by ExxonMobil and its partners to design the Rovuma LNG project. By leveraging our expertise in modularization and electrified LNG, we are committed to support ExxonMobil and its partners towards final investment decision, as well as strengthening our presence in Mozambique to contribute to long-term economic growth and its ambition to become one of Africa’s leading LNG exporters.”*

Farhan Mujib, Representative Director, President of JGC, commented: *“We are pleased to have been awarded by ExxonMobil and its partners, large-scale and environmentally efficient LNG Project in Mozambique. With the global focus on decarbonization and energy security, the JGC Group is accelerating the promotion of energy transition, and this project is firmly in line with the direction of our strategy. We are convinced this project of national significance will contribute to enhance economic and industrial growth in Mozambique and East Africa.”*

(1) Mtpa: million tons per annum

About Technip Energies

Technip Energies is a leading Engineering & Technology company for the energy transition, with leadership positions in LNG, hydrogen and ethylene as well as growing market positions in blue and green hydrogen, sustainable chemistry and CO2 management. The Company benefits from its robust Project Delivery model supported by an extensive Technology, Products and Services offering.

Operating in 34 countries, our 16,000 employees are fully committed to bringing our clients’ innovative projects to life, breaking boundaries to accelerate the energy transition for a better tomorrow.

Technip Energies shares are listed on Euronext Paris. In addition, Technip Energies has a Level 1 sponsored American Depositary Receipts (“ADR”) program, with its ADRs trading over the counter.

Important Information for Investors and Securityholders

Forward-Looking Statements

This Press Release contains forward-looking statements that reflect Technip Energies’ (the “Company”) intentions, beliefs or current expectations and projections about the Company’s future results of operations, anticipated revenues, earnings, cashflows, financial condition, liquidity, performance, prospects, anticipated growth, strategies and opportunities and the markets in which the Company operates. Forward-looking statements are often identified by the words “believe”, “expect”, “anticipate”, “plan”, “intend”, “foresee”, “should”, “would”, “could”, “may”, “estimate”, “outlook”, and similar

expressions, including the negative thereof. The absence of these words, however, does not mean that the statements are not forward-looking. These forward-looking statements are based on the Company's current expectations, beliefs and assumptions concerning future developments and business conditions and their potential effect on the Company. While the Company believes that these forward-looking statements are reasonable as and when made, there can be no assurance that future developments affecting the Company will be those that the Company anticipates.

All of the Company's forward-looking statements involve risks and uncertainties, some of which are significant or beyond the Company's control, and assumptions that could cause actual results to differ materially from the Company's historical experience and the Company's present expectations or projections. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those set forth in the forward-looking statements.

For information regarding known material factors that could cause actual results to differ from projected results, please see the Company's risk factors set forth in the Company's 2023 Annual Financial Report filed on March 8, 2024, with the Dutch Autoriteit Financiële Markten (AFM) and the French Autorité des Marchés Financiers (AMF) which include a discussion of factors that could affect the Company's future performance and the markets in which the Company operates.

Forward-looking statements involve inherent risks and uncertainties and speak only as of the date they are made. The Company undertakes no duty to and will not necessarily update any of the forward-looking statements in light of new information or future events, except to the extent required by applicable law.
